PROFESSIONAL SUMMARY

Frontend engineer with **2+ years** of experience building **user interfaces** and **web applications** using **React.js**. A self-motivated and lifelong learner passionate about modern **web development** with an emphasis on **user experience** and **performance**.

EXPERIENCE

Digital Engineer

Nov 2023 - March 2025

Sonata Software

Bengaluru, India

- Led the frontend development of an internal project, **overseeing the development** and implementation of **user interfaces** using **React.js** and **Zustand** as state management.
- Created mock-ups using Figma** and collaborated closely with stakeholders and clients to envision the implementation of the specified designs and **speed up MVP creation by 20%**.
- Utilized **Tailwindcss** for **faster prototyping** resulting in an increase in **productivity by 25%** and developer experience.
- Enhanced engagement by 20%** making it **mobile friendly** and **responsive** across various devices and layouts while ensuring consistent design using vendor prefixes.
- Optimized application performance using **Lighthouse** and **React Devtools** and **significantly improving performance by 30%** and a **performance score of 98**.

Digital Associate Engineer

Sept 2022 - Oct 2023

Sonata Software

Bengaluru, India

- Designed responsive user interfaces with **React.js** and **TypeScript**, optimized layouts using CSS techniques, explored state management strategies, and continuously learned new technologies to enhance frontend development productivity.

PROJECTS

BingeTown | [React.js](#), [Typescript](#), [Tailwindcss](#), [Framer motion](#), [Firebase](#)

[link](#)

- Developed a movie streaming platform with **React.js** and **Firebase** supporting over **500 concurrent users**
- Employed **OAuth(google and password)** login for authentication achieving a **95% adoption rate**
- Opted for **Firestore** as a **NoSQL database** for storing user profiles, saved and watched titles
- Enabled **movie/show search** across **10+ genres**(action, adventure, horror and more)
- Added recommendations based on currently viewing title, improving **retention rate by 30%**

Lowkey Music | [React.js](#), [Typescript](#), [Tailwindcss](#), [Zustand](#), [Jiosaavn API](#), [Wavesurfer.js](#)

[link](#)

- Developed a **web based music player** combining designs of Spotify and SoundCloud
- Introduced store based **state management** using **Zustand**
- Added support for creating playlists and favorites
- Implemented **multi-search** to search across tracks, artists, playlists and albums
- Displays playlists and albums from **10+ genres**(Hip Hop, Rock, Pop, Regional and more)

EDUCATION

Cambridge Institute of Technology

March 2018 - July 2022

Bachelor of Engineering in Electronics and Telecommunication Engineering

Bengaluru, India

SKILLS

Languages and skills: HTML, CSS, JavaScript, Typescript, JSON, AJAX, DOM manipulation, Flexbox, Grid, Responsive design, MySQL, REST, GraphQL, Troubleshooting, Problem solving

Frameworks and Libraries: React.js, Next.js, Tailwindcss, Zustand, React query, Redux, Jest, Testing Library

Developer Tools: npm, git, vs code, devtools, lighthouse, prettier, eslint

Build tools: Webpack, Vite

Platforms: GitHub, Vercel, Nelfy, Firebase

Soft skills: Fluent communication, Collaboration, Empathy
